EURUSD: Rallies On Correction But With Caution

EURUSD: With EUR closing higher on a rally on Wednesday, further upside is envisaged. However, chart situation of the 1 hourly and 4 hourly charts are not favoring a move higher that much. Resistance is seen at 1.0950 level with a cut through here opening the door for more downside towards the 1.1000 level. Further up, resistance lies at the 1.1050 level where a break will expose the 1.1100 level. Its daily RSI is bullish and pointing higher supporting this view. On the downside, support lies at the 1.0800 level where a violation will aim at the 1.0750 level. A break of here will aim at the 1.0700 level, its psycho level with a turn below that level targeting the 1.0650 level. Further out, resistance comes in at the 1.0600 level. **All in all, EUR remains biased to the downside in the medium term though facing corrective risk**

Strategy: Sell at 1.0821, Stop loss at 1.0900, Price target at 1.0700 & 1.0675

Note: This is a new trade as EUR may not be able to sustain its Wednesday gains. The broader trend remains lower.
